EDUCATION

University of Michigan-Ann Arbor — **Ann Arbor, MI**
B.S. in ***Computer Science and Statistics*** — Exp. May 2028
- **Relevant Coursework:** Discrete Math, Programming & Intro to Data Structures (C++)

Clearview Regional High School — **Harrison Township, NJ**
- **GPA:** 99.52/100.00 | ACT: 33/36 | 16 APs incl. AP Calc AB/BC (5), AP Stats (5) — Sep 2022 - Jun 2026

EXPERIENCE

American Economic Liberties Project (via Michigan Data Consulting) — **Oct 2026 - Present**
Data Analyst Consultant | Python, SQL, CourtListener API, SEC EDGAR — *Ann Arbor, MI*
- Designing a new backend and catalog schema to replace AELP's static Big Tech Abuse Tracker (200+ entries, 5 companies), targeting 25+ corporations with 6 filter dimensions (incl. 8 harm categories, 5 jurisdictions) and 3 sort orders.
- Building ingestion pipelines turning news articles into categorized company records joined to CourtListener and SEC data, enabling continuous staff updates after handoff, plus intake and structured sorting for a public antitrust-reporting questionnaire.

UnitNode - Replacing Outsourced Property Management — **Dec 2024 - Nov 2025**
Co-Founder | SQL (PostgreSQL/Supabase), Python, TypeScript, REST APIs, Stripe API, Vercel — *Mullica Hill, NJ*
- Designed the PostgreSQL (Supabase) data model and end-to-end workflows for leases, bills, and payments, incl. an email-parsing pipeline turning unstructured utility emails into structured tenant bills with due dates, feeding Stripe billing.
- Ran user interviews with property management firms and homeowners and shipped weekly iterations from their feedback, growing the platform to 1,900+ properties and 40+ owners across multiple states within 8 months.

NJ Governor's School of Engineering & Technology → TaintMonkey (IEEE Xplore) — **Jun 2025 - Oct 2025**
Research Scholar (1 of 64) & Publication Co-Author | Python, Pytest, PyPI, LaTeX, Figma — *New Brunswick, NJ*
- Selected for a statewide STEM research program (<1% acceptance) at Rutgers-CoE; co-developed TaintMonkey, a dynamic taint analysis library for Flask apps (monkey patching, fuzzing), presented at MIT URTC 2025 and published in IEEE Xplore.
- Added JSON-input tainting and fixed data-flow tracking bugs; built 32 of 118 apps in JungleGym, a CWE-labeled benchmark dataset; wrote the paper's Experimental Procedures and designed all figures referenced in our publication.

Home Vista Realty — **Jun 2024 - Sep 2024**
Data and Automation Analyst Intern | Python, Excel, OpenAI API — *Philadelphia, PA*
- Built a 1,160+ property database across NJ and PA and an OpenAI API-powered analyzer for Philadelphia Water Department billing reports, cross-referencing month-by-month data to flag water-cost anomalies at scale.
- Identified the water-cost threshold at which tenants began missing payments and flagged properties approaching it using historical billing data, targeting 12 high-risk Philadelphia homes for low-waste utility upgrades with local contractors.

PROJECTS

E-Commerce Churn Analysis & Pricing Strategy: ML Prediction & CLV Optimization — **Jul 2026 - Aug 2026**
Data Analyst | Python (scikit-learn, Pandas, NumPy), SQL, Tableau — *Under NDA until W27*
- Trial project for a national gym franchise using a public 18,000-record e-commerce churn dataset as a stand-in for member data; benchmarked Logistic Regression against a Random Forest (0.922 ROC-AUC), flagging 76.2% of churners at 94.2% precision.
- Identified support calls and cart abandonment as top churn drivers and modeled 5/10/20% promotion scenarios across $1M+ at-risk CLV; recommended a targeted 10% offer protecting $50K (∼50% ROI), earning a paid W27 engagement.

M&A SME Financial Analysis: 10-Year Baseline & 5-Year Projections — **Jun 2026 - Jul 2026**
Financial Analytics Consultant | Excel, SQL, Tableau — *Mullica Hill, NJ*
- Modeled 10 years of financials for a $40.8M-revenue SME and forecast 5 years across Bull/Base/Bear scenarios, using SQL for KPI aggregation (CAGR, margin trends) and an interactive Tableau Public dashboard.
- Advised a pivot from top-line growth to cost discipline: a 3-year margin-improvement phase before pursuing an exit.

ADDITIONAL

Data & Analytics: SQL (PostgreSQL), Python (Pandas, NumPy, scikit-learn), Excel, Tableau, Data Modeling, ETL Pipelines
Business Analysis: Requirements Gathering, User Interviews, Financial Modeling, Scenario & ROI Analysis
Engineering: TypeScript, C++, Git, REST APIs, Supabase, Vercel, Claude Code, Cursor
Interests: Bodybuilding, Distance Running (2x Ultramarathons, 2x Marathons), MMA (Jiu-Jitsu World Medalist), Skydiving, Hiking
