EDUCATION

University of Michigan-Ann Arbor

B.S. in Computer Science and Economics

- **Extracurriculars:** Michigan Data Consulting, Iota Omega Epsilon Professional Fraternity
- **Relevant Coursework:** Discrete Math, Programming & Intro to Data Structures

Ann Arbor, MI

Aug 2026 - exp. May 2030

Clearview Regional High School

- **GPA:** 99.52/100.00 | **ACT:** 33/36 | **Coursework:** (16 APs) AP Calc AB/BC (5), AP Stats (5)

Harrison Township, NJ

Sep 2022 - Jun 2026

EXPERIENCE

UnitNode - Replacing Outsourced Property Management

Dec 2024 - Nov 2025

Co-Founder

Mullica Hill, NJ

TypeScript/JavaScript, HTML/CSS, Vercel, Supabase, APIs

- Led end-to-end development of a property management platform spanning leases, bills, and payments, shipping integrated Stripe billing, auto-translated tenant alerts, and Gmail parsing that turns utility emails into tenant bills with due dates.
- Managed database architecture, UI/UX design, and repository deployments while listening to and iterating upon weekly user feedback to scale our product to 1,900+ properties and 40+ owners across multiple states within 8 months.

New Jersey Governor's School of Engineering and Technology

Jun 2025 - Jul 2025

Research Scholar

New Brunswick, NJ

Python

- 1 of 64 scholars selected for NJ's #1 STEM summer program (<1% acceptance), a 3-week engineering residency at Rutgers University-CoE spanning Modern Physics, Applied Robotics, Sustainable Energy, and AI/ML Engineering.
- Placed 2nd/16 teams in program Robotics competition with custom IR-sensor and autonomous grid-lapping algorithm, and built a Gemini-powered emotional support assistant that learns from past text messages to emulate a specific person.

Home Vista Realty

Jun 2024 - Sep 2024

Data Analyst Intern

Philadelphia, PA

Excel, Python

- Built a 1,160+ property database across NJ and PA and integrated the OpenAI API to automate analysis of Philadelphia Water Department billing reports, cross-referencing month-by-month utility data to flag cost anomalies by property.
- Used the analysis to rank properties and target the 12 Philadelphia homes with the highest water costs, partnering with local contractors to replace outdated utility systems with low-waste solutions to lower recurring water bills.

PROJECTS

E-Commerce Churn Analysis & Pricing Strategy: ML Prediction Modeling

Aug 2026

Data Analyst

Mullica Hill, NJ

Python (scikit-learn, Pandas, NumPy), SQL, Tableau

- Built a Random Forest churn classifier (0.922 ROC-AUC, 94.2% precision) and MECE pricing framework on a public 18,000-record dataset as a trial project for a local gym franchise.
- Recommended a 10% promotion strategy projected to protect +\$50K (~50% ROI), earning a paid W27 engagement.

TaintMonkey: Dynamic Taint Analysis of Python Web Applications Using Monkey Patching

Jul 2025 - Oct 2025

Researcher, Presenter (MIT URTC '25), & Publication Co-Author (IEEE Xplore)

Cambridge, MA

Python, Pytest, PyPI, LaTeX, Figma

- Added JSON-input tainting and fixed data-flow tracking bugs in TaintMonkey, a Python library that monkey patches Flask endpoints to detect tainted data reaching unsanitized sinks without changing source code.
- Built 32 of 118 CWE-mapped vulnerable Flask apps and matching vulnerability plugins for our JungleGym benchmark.
- Wrote experimental procedures, designed all figures in Figma, and presented at MIT URTC 2025 (published in IEEE Xplore).

ADDITIONAL

Technical Skills: Python (scikit-learn, Pandas, NumPy), SQL (PostgreSQL), C++, Excel, Tableau

Tools: Claude Code, Cursor, VS Code, Git

Interests: Bodybuilding, Distance Running (2x Ultramarathons, 2x Marathons), MMA (Jiu-Jitsu World Medalist), Skydiving, Hiking
