EDUCATION

University of Michigan-Ann Arbor

Ann Arbor, MI

B.S. in Computer Science and Statistics

Exp. May 2029

- **Relevant Coursework:** Discrete Math, Programming & Intro to Data Structures (C++)
- **Extracurriculars:** Michigan Data Consulting, Iota Omega Epsilon Professional Fraternity

Clearview Regional High School

Harrison Township, NJ

- **GPA:** 99.52/100.00 | **ACT:** 33/36 | 16 APs incl. AP Calc AB/BC (5), AP Stats (5)

Sep 2022 - Jun 2026

EXPERIENCE

UnitNode - Replacing Outsourced Property Management

Dec 2024 - Nov 2025

Co-Founder

Mullica Hill, NJ

SQL (PostgreSQL/Supabase), TypeScript, Python, Vercel, Application Programming Interfaces (APIs)

- Built end-to-end data workflows for properties, leases, bills, and payments on PostgreSQL (Supabase), including an email-parsing pipeline that turns unstructured utility emails into structured tenant bills with due dates, feeding Stripe billing.
- Conducted user interviews with property management firms and homeowners and iterated on weekly feedback, helping grow the platform to 1,900+ properties and 40+ owners across multiple states within 8 months.

NJ Governor's School of Engineering & Technology → TaintMonkey (IEEE Xplore)

Jun 2025 - Oct 2025

Research Scholar (1 of 64, <1% acceptance) & Publication Co-Author

New Brunswick, NJ

Python, Pytest, PyPI, LaTeX, Figma

- Selected for NJ's #1 STEM summer program at Rutgers; began TaintMonkey, a dynamic taint analysis library for Flask apps, later presented at MIT URTC 2025 and published in IEEE Xplore. Placed 2nd/16 in the program's robotics competition.
- Added JSON-input tainting and fixed data-flow tracking bugs; built 32 of 118 apps in JungleGym, a CWE-labeled benchmark dataset; wrote the paper's Experimental Procedures and designed all figures referenced in our publication.

Home Vista Realty

Jun 2024 - Sep 2024

Data and Automation Analyst Intern

Philadelphia, PA

Python, Excel, OpenAI API

- Built a 1,160+ property database across NJ and PA and an OpenAI API-powered analyzer for Philadelphia Water Department billing reports, cross-referencing month-by-month data to flag water-cost anomalies at scale.
- Identified the water-cost threshold at which tenants began missing payments and flagged properties approaching it using historical billing data, targeting 12 high-risk Philadelphia homes for low-waste utility upgrades with local contractors.

PROJECTS

E-Commerce Churn Analysis & Pricing Strategy: ML Prediction & CLV Optimization

Jul 2026 - Aug 2026

Data Analyst

under NDA until W27

Python (scikit-learn, Pandas, NumPy), SQL, Tableau

- Trial project for a national gym franchise using a public 18,000-record e-commerce churn dataset as a stand-in for member data; benchmarked Logistic Regression against a Random Forest (0.922 ROC-AUC), flagging 76.2% of churners at 94.2% precision.
- Identified support calls and cart abandonment as top churn drivers and modeled 5/10/20% promotion scenarios across \$1M+ at-risk CLV; recommended a targeted 10% offer protecting \$50K (~50% ROI), earning a paid W27 engagement.

M&A SME Financial Analysis: 10-Year Baseline & 5-Year Projections

Jun 2026 - Jul 2026

Financial Analytics Consultant

Mullica Hill, NJ

Excel, SQL, Tableau

- Modeled 10 years of financials for a \$40.8M-revenue SME and forecast 5 years across Bull/Base/Bear scenarios, using SQL for KPI aggregation (CAGR, margin trends) and an interactive Tableau Public dashboard.
- Advised the client to pivot from top-line growth to cost discipline, recommending a three-year margin-improvement phase before pursuing an exit to present a more profitable asset to acquirers.

ADDITIONAL

Data & Analytics: SQL (PostgreSQL), Python (Pandas, NumPy, scikit-learn), Excel, Tableau

Engineering: TypeScript, C++, Git, REST APIs, Supabase, Vercel, Claude Code, Cursor

Interests: Bodybuilding, Distance Running (2x Ultramarathons, 2x Marathons), MMA (Jiu-Jitsu World Medalist), Skydiving, Hiking
